PROJECTS

• Face Recognition Attendance System

- An application that records the attendance of the student by recognising his/her face through the webcam. OpenCV and Image processing tools were used to build the project

• Text Summarizer

- An application that summarises the long text or data as per the user requirement using NLP, BeautifulSoup and Machine Learning technology.

• Website - Replit project

- Designed and developed a website for a medical professional to provide comprehensive clinic information and facilitate appointment scheduling.

SOFT SKILLS

- **Leadership:**

- In my role as a core team member for the college technical fest Promethean-2k19, I demonstrated leadership by organizing and managing various technical events and activities, ensuring their successful execution. I lead a team of 4 people in our undergrad to develop two projects in our third and fourth year of college.

- **Time Management:**

- Maintained a high CGPA of 9.59 during my Bachelor's program at B.V. Raju Institute of Technology through effective time management and academic prioritization.

- **Attention to detail, Problem-solving skills, teamwork:**

- While working at Delhivery, I applied a keen Attention to detail to identify and rectify intricate issues within the development of microservices, working collaboratively with my team and cross teams to demonstrate Strong problem-solving abilities and ensuring the seamless delivery of high-quality solutions.

HOBBIES

- Passionate about blogging, I enjoy sharing my insights and experiences on various subjects, fostering creativity.
- Cooking is a delightful hobby that allows me to experiment with flavors and techniques, creating delicious dishes to share with family and friends.
- Cricket, a sport I am passionate about, not only serves as a great way to stay active but also as a means of teamwork and strategic thinking.
